SMART PANTRY MANAGER

1. Project Overview

Smart Pantry Manager is an Android application designed to help users manage pantry ingredients, discover recipes based on available ingredients, and maintain a shopping list.

2. Application Features

- Add ingredients to the pantry.

- View, edit, and delete pantry ingredients.

- View suggested recipes based on ingredients available in the pantry.

- Identify available and missing ingredients for recipes.

- Add items to a shopping list.

- Mark shopping list items as completed and deleted items.

- Save data so that it remains available when the application is reopened.

3. Project Structure

The submission contains the following folders:

- SmartPantryManager: The complete Android Studio project, including Java source code, XML layouts, resources, and build configuration.

- Screenshots: Visual evidence of the application's screens and functionality.

4. How to Open and Run the Application

1. Open Android Studio.

2. Select File → Open.

3. Navigate to the `SmartPantryManager` folder inside the submission folder.

4. Select the `SmartPantryManager` folder and open it.

5. Wait for Gradle sync to complete.

6. Run the application using an Android emulator or a compatible Android device.

5. Important Source Code Files

The Java source files are located inside `app/src/main/java/`.

- MainActivity.java: Displays the home screen and handles navigation.

- ActivityIngredientActivity.java: Handles adding and updating ingredients.

- PantryActivity.java: Displays and manages pantry ingredients.

- SuggestedRecipesActivity.java: Displays suggested recipes.

- ShoppingListActivity.java: Manages shopping-list items.

- DatabaseHelper.java: Handles database operations and saved application data.

6. User Interface Files

The XML layout files are located inside `app/src/main/res/layout/`. These files define the appearance and layout of the application's screens.

7. Screenshots

The `Screenshots` folder contains screenshots demonstrating the application's main screens and functionality.

8. Conclusion

Smart Pantry Manager provides a convenient way to manage pantry ingredients, explore recipes, and organize shopping items in one Android application.
